## Versatile, Attractive and Strong: Glued Thermo Posts

Our glued thermo posts are an aesthetically pleasing solution that can be used for a range of exterior applications, from cladding and light-bearing structures to pergolas and fencing for the garden. These versatile posts, made with glued and finger-jointed thermally modified Nordic pine, are robust and durable – and they're easy on the eye too, with the pine's characteristic knotted pattern making them ideal for giving a clear visual identity to any project where you can envisage them.

Pergola made of glued thermo-pine posts

## Usage:

Light-bearing structures, pergolas, fencing, exterior cladding, mixed outdoor usage

## Key benefits:

- Thermally modified grade A Nordic pine posts
- A versatile product with a variety of potential applications
- Suitable for use in all climates
- Available with Class B fire protection
- Dimensionally stable throughout, with gluing and finger jointing further enhancing the posts' structural strength
- A sustainable product utilizing shorter upcycled lengths of wood
- A wide range of products are available with a selection of dimensions and thicknesses
- Freedom of choice when it comes to length
- Choice of finishing options available, including brushing and embossing
- When left untreated, the posts gain a beautiful silver patina over time
- Paint coating options also available (Note: In case of four visible sided coatings consult as some paint solutions may show drying stripes on wood surface)

Thermory glued thermo-pine post, 130 x 130 mm
